Cumulative graduation rate: Cohorts 1-46 81.8%

Note (1): in calculation of graduation rates, students were included (as much as possible) in the cohort # in which they *originally* started. However, numerous factors may cause students to "jump" cohorts. Therefore they may ultimately finish the program; but, in > 2 years and with different cohorts than originally enrolled.

Note (2): the cohort model of course delivery was discontinued after Cohort 46. Beginning with academic year 2017-18, a "reporting cohort" is established based upon all new students who enter the MBA program during Fall, Spring, or Summer of the time period from the start of Fall semester through the start of Term-B of Summer semester.
